

## SERVICE BULLETIN 06-174-1

Contact: Mike Hankins, Director of Customer Relations  
Mainship Corporation  
[mhankins@mainship.com](mailto:mhankins@mainship.com)

June 23, 2006

Model(s) Affected: Mainship Models.

Bulletin Subject: ZF/Mathers Control System

Authorized Labor Time: Not Applicable

Please be aware there may be a possible loss of control with the ZF/Mather Controls operation while boat is underway. ZF/Mathers is currently testing, but is suggesting that the relay(s) be changed IF the condition occurs.

We expect a bulletin soon from ZF/Mathers regarding a “shut down” possibility and the proper “re-start” procedures should that occur. ZF/Mathers is working on determining what the root cause is and the resolution to prevent.

Any questions should be directed toward MAINSHIP Customer Service representatives.
