

Boat position to avoid
forming so can't reach
swim platform.

This does not look
better size for
movable cranes?

Describe
high station + which
controls about in
at this location.

Hybridized occurs?

Functional panels suggest so
can add canopy to roofline.

add in bathroom

? not sure what's
happening here?

front edge of hybridized roof
to be same curve as salon
cabin roof.

slightly curved
edge of sails at
port position.

Window size + positions to
allow if possible.

open windows

and need this space for gusting winds.

Don't need this door
